IN THERMAL STABILITY AND PROCESSIBILITY**

(57) Abstract

PURPOSE: To improve the thermal stability, esp. the discoloration resistance during long-term exposure to high temp., and the processibility during thermal molding of a rigid chlorinated resin compsn. contg. no plasticizer.

CONSTITUTION: The compsn. comprises a chlorinated resin, at least one alkytfin compd. tris(2-hydroxyethyl)isocyanurate, and at least one compd. selected from complex compds. of at least one salt selected from sodium, magnesium, calcium, and barium perchlorates with at least one polyhydric alcohol or its deriv.
